

Proudly Representing Manufacturing Partners Who Act As Solution Providers For Our Customers.

Rupture Pin Technology is a specialty products division of Taylor Valve Technology. Rupture Pin Technology is a leading manufacturer of high quality buckling pin valves. Every Rupture Pin product is designed to meet the highly demanding requirements of oil and gas producers, refiners, chemical plant operators, power generators and the processing industry in order to more effectively control their liquid, steam or gas operations.

Magnetic Level Gauges, Magnetostrictive Level, Point Level Switches, and Laser Level Transmitter.

Jogler direct-reading liquid level/flow indicators are a simple, leak-proof way to observe liquid level in a vessel.

Open Path and Fixed Gas and Flame Detection Products and Services, Man Down Stations.

Their "Smart Sensor" interface has been adapted to many sensor technologies including electromechanical, resistive bridge, PID's, IR's, milliamps, and voltage inputs.

5-year Warranty (Transmitter/Controllers)
Simple 4 Step Calibration on Products
Easy Configuration
Built in Sensor life for E-chem Sensors

pH, ORP, Conductivity, D.O., O₂ Analyzers, Turbidity and Suspended Solids.

Barben Analytical is the market leading analytical supplier that designs, manufactures and sells analytical measurement products for the process industries.

1015 Grupp Road #31733 Saint Louis, MO 63131

Serving the Midwest

ALLIANCE AND DISTRIBUTOR PRODUCTS

Manufacturer of Direct Drive Pressure Gauges
& Pressure Regulators.

Temperature and Pressure Instrumentation.

Temperature Sensors, RTD's and Thermocouples.

Economical Smart pH, ORP, Conductivity, Dissolved
Oxygen, Chlorine Dioxide, and other water quality
sensors and transmitters.
